Project Name	Dissecting The Digital Landscape: A Comprehensive Analysis Of Social Media
Maximum Marks	4 Marks

Solution Architecture:

It seems like you're interested in conducting a comprehensive analysis of social media in the context of solution architecture. This is a substantial undertaking, and it's important to break it down into phases, as you've mentioned. In phase 1, you can start by defining the scope and objectives of your analysis:

- Determine the primary goals of your analysis. What specific aspects of social media and solution architecture.

- Research the current state of social media platforms, trends, and emerging technologies.

- Identify the key stakeholders who will be involved in this analysis. This may include architects, developers, social media managers, marketing professionals, and others who have a vested interest in the analysis.

- Assess the security implications of integrating with social media platforms. Consider potential risks and mitigation strategies to protect user data and maintain system integrity.
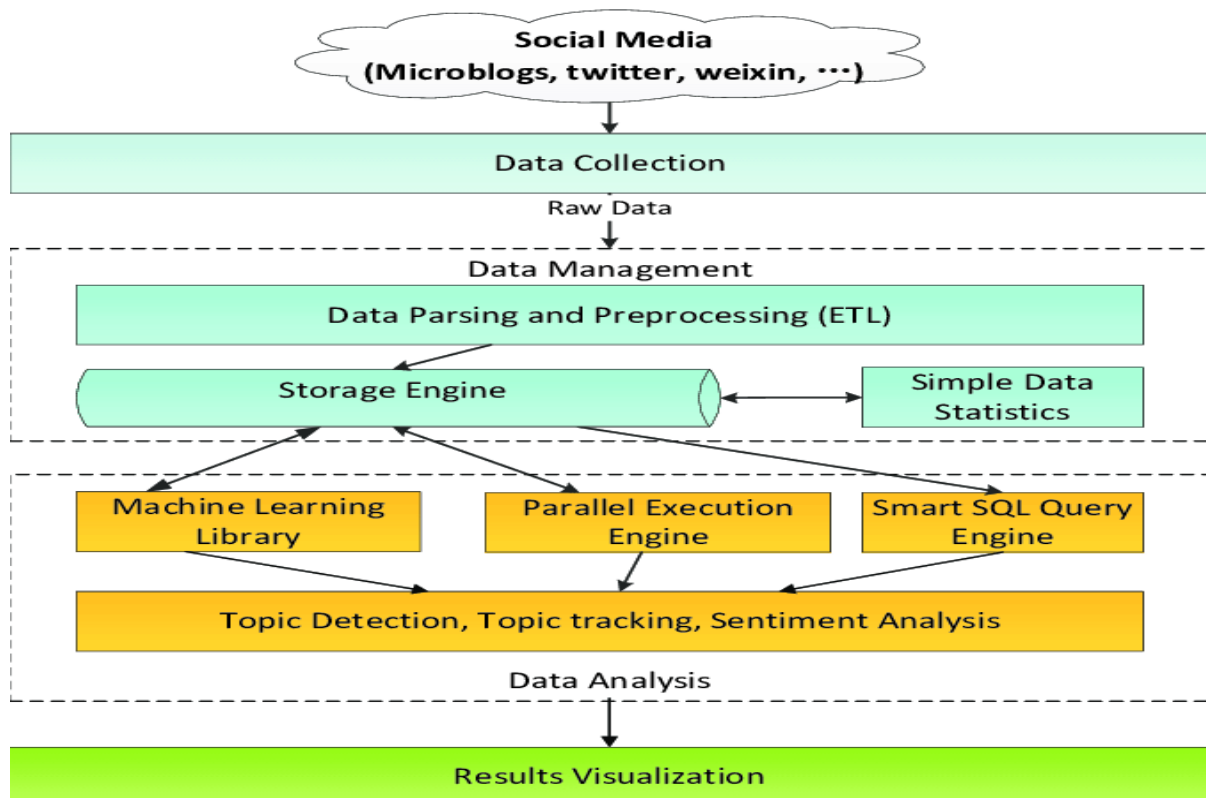

Example - Solution Architecture Diagram:
